Genuine American Made Shutters For Over 40 Years

Danmer manufactures all its Plantation Shutters right here in the USA! No one designs, builds or installs genuine Danmer **Thermalite**, **Ultraluxe** or **Heritage Wood Shutters** except for Danmer.

Some companies claim to have great products, but then they use photographs of Danmer Shutters on their Web sites. They also claim that their products are **made in the USA**, but in reality most Shutters are only assembled in the USA from foreign parts. Danmer shutters are made here in the USA using safe and reliable materials.

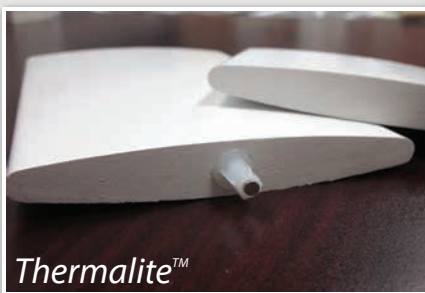

Discover the Danmer Difference
