

# UltraLuxe SHUTTERS... EXCLUSIVELY BY DANMER

UltraLuxe™ Custom Shutters combine the very best materials available to create a brand new product, one that's exclusively designed and built by Danmer. UltraLuxe combines Genuine Thermalite™ synthetic material with Premier Hardwood™ (PHD), the highest grade hardwood available. Only UltraLuxe shutters from Danmer bring you the wide variety of design options that these two materials together can provide.

UltraLuxe uses Premier Hardwood frames and stiles which allow your large and uniquely shaped openings to have custom shutters built for them. Premier Hardwood ensures that your shutters will never warp, sag or bow over time.

UltraLuxe uses our patented Thermalite Louvers, adding the utmost in insulation compared to traditional wood louvers. Thermalite will help lower your energy bills by keeping your home warmer in the winter, yet cooler in the summer.
